Multi-Feeder

The Multi-Feeder's flexible and durable design handles today's difficult inserts and will provide many dependable years of service.

The Kansa Multi-Feeder is designed to collate inserts one on top of the other and insert them all at one time into a jacket on your existing inserting machine.

The Kansa Multi-Feeder is a reliable and dependable feeder that can run with your Kansa 480, Kansa 760 or Muller 227 inserting machine. You can increase your number of inserts without moving the jacket station or delivery.

The Kansa Multi-Feeder is an inline design and is placed perpendicular to your existing inserting machine.

Features Include:

- Collate and feed up to 8 inserts
- Easy set-up and operation
- Add more inserts to your existing Kansa 760, Kansa 480 or Muller 227 inserting machine
- Add inserting capacity without moving the jacket station or delivery
- Modular design expandable in two station units
- Engineered to run difficult inserts such as Glossy Single Sheets, Die Cuts, Cards, and Slick Glossy Tabs
- Utilizes state-of-the-art electronic line shaft technology

Multi-Feeder
