Quadracart

For decades the Kansa Quadracart has been the mainstay in product transportation and storage for newspapers, commercial printers, and binderies.

Kansa Quadracart is an industry standard material handling solution proven throughout the world. In the printing industry, the cart provides storage space for thousands of newspapers and makes it easy to move products from press to inserter. In the print shop the cart provides storage space for a variety of stock and makes it easy to move from storage to press or bindery area.

The Quadracart conserves valuable floor space by relying on height for storage volume. It uses less space making your plant neat and orderly, a real help to managers in creating more efficiency.

The patented design and long-lasting durability will sustain the constant rugged, long-term use in any pressroom, mailroom, or bindery.

**Quadracart 30 x 30
with self-leveling shelves**

**Quadracart 30 x 30
with shelves**

**Quadracart 30 x 30
without shelves**

Quadracart

(Optional)

Base Wedge Kit (4 base wedges in each kit)

The base wedge slants inward to securely hold the stock in position. They are easy to install and can be added to your existing Quadracart.

4" Ball Bearing Casters

Heavy-duty 4" ball bearing casters are designed to take the rugged use your plant requires. Load up the Quadracart and it still moves smoothly and with little effort.

Patented Brake

The patented quick-release brake holds the Quadracart in place while allowing it to pivot a full 360° providing easy access to all storage compartments.

Quadracart 30 x 30 Specifications

Base	30"x30"
Height	61"
Shelf	13"x17"
Weight (without shelves)	191 lbs.
Weight of Shelf Kit (4 shelves)	22 lbs.
Weight of Base Wedge Kit (4 Base Wedges)	25 lbs.
Wheels	4" ball bearing casters
Capacity	Approx. 2,000 half-fold 20-page papers, Approx. 10,000 8-page tabloids or Approx. 48,000 11" x 17" 20 pound bond sheets

Self-Leveling Shelves

Self-leveling shelves were designed to eliminate the repetitive bending, lifting, and stooping motions that are the cause of most back injuries. Empty height is 35" with full travel to the bottom of the Quadracart. The shelves are self-leveling and keep product at a constant height. This is an optional shelf and can be added to your existing Quadracart.

Quadracart 20 x 20 Specifications

Base	20 1/2" x 20 1/2"
Height	61"
Shelf	8 3/4" x 11 3/4"
Weight	98 lbs.
Weight of Shelf Kit (4 shelves)	11 lbs.
Weight of Base Wedge Kit (4 Base Wedges)	13 lbs.
Wheels	4" ball bearing casters
Capacity	Approx. 48,000 8 1/2" x 11" 20 pound bond sheets

Shelf Kit (4 shelves in each kit)

To meet the needs of the print shop, heavy-duty, easy to install shelf kits are available for the Kansa Quadracart. These 13"x17" or 8 3/4"x11 3/4" shelves can be positioned at three different heights (15", 27" and 39"). The shelves slant inward to securely hold the stock in position. The shelf kit gives you the flexibility of easily adding from one to twelve shelves to meet your specific requirements.

Kansa Quadracarts are shipped disassembled or can be shipped assembled for an additional charge.
