

Quadracart

For decades the Kansa Quadracart has been the mainstay in product transportation and storage for newspapers, commercial printers, and binderies.

Kansa Quadracart is an industry standard material handling solution proven throughout the world. In the printing industry, the cart provides storage space for thousands of newspapers and makes it easy to move products from press to inserter. In the print shop the cart provides storage space for a variety of stock and makes it easy to move from storage to press or bindery area.

The Quadracart conserves valuable floor space by relying on height for storage volume. It uses less space making your plant neat and orderly, a real help to managers in creating more efficiency.

The patented design and long-lasting durability will sustain the constant rugged, long-term use in any pressroom, mailroom, or bindery.
